Dear Mr. Tucker:

The Commission has issued the enclosed Amendments Nos. 145, 145, and 142 to Facility Operating Licenses Nos. DPR-38, DPR-47 and DPR-55 for the Oconee Nuclear Station, Units Nos. 1, 2 and 3. These amendments consist of changes to the Station's common Technical Specifications (TSs) in response to your request dated May 29, 1985.

These amendments revise the TS Table 6.1-1 to reflect an increase in the required number of nuclear equipment operators in conformance to NUREG-0737, Item I.A.1.3.

A copy of the Safety Evaluation is also enclosed. Notice of Issuance of the enclosed amendments will be included in the Commission's next biweekly Federal Register notice.

Sincerely,

~~Original signed by~~

Helen Nicolaras, Project Manager

DUKE POWER COMPANY

DOCKET NO. 50-269

OCONEE NUCLEAR STATION, UNIT NO. 1

AMENDMENT TO FACILITY OPERATING LICENSE

Amendment No. 145
License No. DPR-38

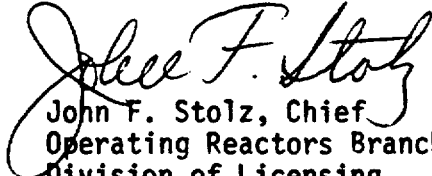

1. The Nuclear Regulatory Commission (the Commission) has found that:
 - A. The application for amendment by Duke Power Company (the licensee) dated May 29, 1985, complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations set forth in 10 CFR Chapter I;
 - B. The facility will operate in conformity with the application, the provisions of the Act, and the rules and regulations of the Commission;
 - C. There is reasonable assurance (i) that the activities authorized by this amendment can be conducted without endangering the health and safety of the public, and (ii) that such activities will be conducted in compliance with the Commission's regulations;
 - D. The issuance of this amendment will not be inimical to the common defense and security or to the health and safety of the public; and
 - E. The issuance of this amendment is in accordance with 10 CFR Part 51 of the Commission's regulations and all applicable requirements have been satisfied.
2. Accordingly, the license is amended by changes to the Technical Specifications as indicated in the attachment to this license amendment, and paragraph 3.8 of Facility Operating License No. DPR-38 is hereby amended to read as follows:

3.8 Technical Specifications

The Technical Specifications contained in Appendices A and B, as revised through Amendment No. 145 are hereby incorporated in the license. The licensee shall operate the facility in accordance with the Technical Specifications.

3. This license amendment is effective as of the date of its issuance.

AMENDMENT NO. 142 TO FACILITY OPERATING LICENSE NO. DPR-55

DUKE POWER COMPANY
OCONEE NUCLEAR STATION, UNITS NOS. 1, 2 AND 3
DOCKETS NOS. 50-269, 50-270 AND 50-287

1.0 Introduction

By letter dated May 29, 1985, Duke Power Company (the licensee) proposed changes to the Technical Specifications (TSs) of Facility Operating Licenses Nos. DPR-38, DPR-47, and DPR-55 for the Oconee Nuclear Station, Units 1, 2 and 3. These amendments would consist of changes to the Station's common TSs.

These amendments would revise TS Table 6.1-1 to reflect an increase in the required number of nuclear equipment operators in conformance to NUREG-0737, Item I.A.1.3. The licensee submitted these amendment changes in response to an NRC letter dated April 1, 1985. In our letter, we noted that the number of nuclear equipment operators (i.e. auxiliary operators) required by TS Table 6.1-1 is, for some situations, less than the number specified in NUREG-0737, Item I.A.1.3. The licensee submitted the May 29, 1985 amendment request to include the correct number of nuclear equipment operators.

2.0 Evaluation

In the aftermath of the Three Mile Island (TMI) accident, a number of studies and investigations conducted by the NRC, the nuclear industry and others, recommended changes in the numbers, qualifications and organization of nuclear power plant personnel. The subject of the proposed amendments deals specifically with the number of nuclear equipment operators required by TS Table 6.1-1, "Minimum Operating Shift Requirements."

Page 6.1-6, Fifth Line, First Column (One Unit Operating)

The number of nuclear equipment operators (NEO) required, when one unit is operating, is increased from two to four.

Second Column (Two Units Operating)

The number of NEOs required, when only two of the three units are operating, remains the same at five.

Third Column (All Units Operating)

The number of NEOs required, when all three units are operating, is increased from four to five.

Fourth Column (All Units Shutdown)

The number of NEOs required, when all three units are shutdown, is increased from three to five.

Oconee Nuclear Station is a three unit site, with Units 1 and 2 sharing a control room and Unit 3 having its own separate control room. We have reviewed the proposed revisions to TS Table 6.1-1 against the specifications of NUREG-0737, Item J.A.1.3, and find them in conformance therewith and therefore acceptable. The proposed TS changes will upgrade the Oconee TSs to published Commission standards of acceptance and help ensure that adequate shift staffing is available.

3.0 Environmental Consideration

These amendments relate to changes in administrative procedures or requirements. Accordingly, these amendments meet the eligibility criteria for categorical exclusion set forth in 10 CFR 51.22(c)(10). Pursuant to 10 CFR 51.22(b), no environmental impact statement or environmental assessment need be prepared in connection with the issuance of these amendments.

4.0 Conclusion

We have concluded, based on the considerations discussed above, that:
(1) there is reasonable assurance that the health and safety of the public will not be endangered by operation in the proposed manner, and
(2) such activities will be conducted in compliance with the Commission's regulations and the issuance of these amendments will not be inimical to the common defense and security or to the health and safety of the public.

Dated: October 31, 1985
