

REVIEWER NOTE FOR NR-1145-D-101-E

FROM: Seung J. Lee /RA/

August 7, 2001

Per telephone discussion with J. Tchira of Litepro and S. Brightwell of Professional Radiation Consulting, Inc. on 08/07/2001, the manufacturer will perform 100% visual inspection for assembled lens caps for (1) leakage by checking GTLS brightness, (2) proper assembly, and (3) proper labeling in Section 4.0 of Quality Control Program for Litepro, LLC Model Teknolite Torch Sealed Source Device, and (4) testing per ANSI/HPS N43.4-2000 using 5% Lot Tolerance Percent Defective (LTPD) with zero defective criteria for completely assembled flashlights prior to shipping to US distributor in Miami (see also Section 2.0 in QC-2, "Certificate of Quality Control Testing").

The US distributor will perform visual inspection using 5% LTPD with zero defective criteria for leakage and design conformity without breaking clamshell-type package prior to initial distribution.
