NRC ASSIGNS NEW RESIDENT INSPECTOR TO CALVERT CLIFFS NUCLEAR PLANT

Nuclear Regulatory Commission officials in King of Prussia, Pa., have selected Leonard Cline as the agency's resident inspector at the Calvert Cliffs nuclear power plant. He joins Senior Resident Inspector David Beaulieu at the Lusby, Md., plant.

Cline joined the NRC as a reactor engineer in the Region I office in September 1999. He was then assigned as a reactor inspector in the Performance Evaluation Branch in the Region's Division of Reactor Safety. Prior to joining the Agency, he was an officer in the United States Navy, where he completed the Navy's nuclear training program.

Cline earned a bachelor's degree in civil engineering from Pennsylvania State University.

Each U.S. commercial nuclear power plant has at least two NRC resident inspectors. They serve as the agency's eyes and ears at the facility, conducting regular inspections, monitoring significant work projects and talking with plant workers and the public.

The Calvert Cliffs resident inspectors can be reached at 410/586-2626.
