RE: Revised Lot Testing Procedure for QC Program in Sealed Source Device Safety
Evaluation Application

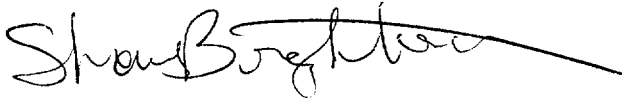

Dr. Seung Lee:

Per our recent discussions, attached is the revised SSD lot testing procedure specific to the QC Program. This procedure has been revised to be applicable to the true SSD classification designation T2GC122222 in accordance with ANSI/HPS N43.4-2000.

All QC Program references to Standard Operating Procedure "Performance Testing for the Litepro Teknolite™ Model Flashlight Containing Gaseous Tritium Light Sources" are revised to reference this new Standard Operating Procedure "Lot Performance Testing for the Litepro Teknolite™ Model Flashlight Containing Gaseous Tritium Light Sources." The original procedure is still applicable to the previous SSD prototype testing that was performed by mb-microtec.

If you have any questions or comments, please contact me at (970) 203-0195 or Mr. Joseph Tchira at (305) 931-6990.

Kindest regards,

PROFESSIONAL RADIATION CONSULTING, INCORPORATED
Shane Brightwell, President

CC: Joseph Tchira, Litepro President
