**SUBJECT: NRC ANNUAL PERFORMANCE ASSESSMENT OF VOGTLE ELECTRIC
GENERATING PLANT**

Dear Ms. Sanders:

The annual performance assessment of the Vogtle Electric Generating Plant has been completed in accordance with the NRC Reactor Oversight Process, using the most recent performance indicators and inspection findings from the last 12 months. The assessment reflects current licensee performance and is described in the enclosed Annual Assessment Letter sent to the Southern Nuclear Operating Company, Inc., on May 31, 2001.

On July 17, 2001, members of my staff will meet with the management of the Southern Nuclear Operating Company, Inc. to discuss the performance of Vogtle. This meeting is scheduled to be conducted at 3:00 p.m. (EDST) at the Plant Vogtle Administrative Building 1st Floor Auditorium in Waynesboro, Georgia.

I would like to personally invite you to attend this Annual Assessment Meeting. Also in conjunction with this meeting, I would like to invite you to a separate meeting with my staff for you and other State and local government officials. This meeting will be conducted at the same location shortly after the conclusion of the Annual Assessment Meeting. The purposes of this separate meeting are to meet the NRC inspectors at Vogtle, and to ensure that you are aware of the NRC inspection and assessment process and the avenues that are available to bring concerns that you or your constituents have to the NRC. This meeting will also provide you the opportunity to inform us of any current personal or constituent concerns with Vogtle. There is also another means for you to become familiar with the Reactor Oversight Process and the specific performance of Vogtle. Through the NRC Web site, you can access the same information we use in our annual assessment of plant performance. This information may be accessed at <http://www.nrc.gov/NRR/OVERSIGHT>.
