MEMORANDUM TO: Glenn M. Tracy, Chief
Operator Licensing, Human Performance
and Plant Support Branch
Division of Inspection Program Management, NRR

FROM: Lawrence Vick, Reactor Engineer (Examiner Qualified)/**RA**
Operator Licensing and Human Performance Section
Operator Licensing, Human Performance
and Plant Support Branch
Division of Inspection Program Management, NRR

SUBJECT: ANS STANDARDS COMMITTEE WORKING GROUP 3.5

During the week of August 6 - 10, I attended as a proxy for Frank Collins, a meeting of the American Nuclear Society Standards Committee Working Group 3.5, "Nuclear Power Plant Simulators for Use in Operator Training and Examination" at the CAE simulator manufacturing facility on Montreal, Canada. The Working Group was updated on the status of the NRC's proposed rule change published in the Federal Register on July 3, 2000 (65 FR 41021). The committee was informed that the final rule package and the associated final Revision 3 of Regulatory Guide 1.149 were being considered by the Commission at this time. The Working Group was commended for their level of involvement during the public comment phase. The Working Group continued discussions regarding scenario based testing with respect to the ANS 3.5-1998. The next meeting of the Working Group will be scheduled contingent upon the NRC's approval of the final rule and implementation. Please find attached a copy of the agenda for the meeting. Thank you for the opportunity to represent the NRC in this forum.
