SUBJECT: COMPLETION OF REGULATORY GUIDE 1.188, STANDARD REVIEW PLAN
FOR LICENSE RENEWAL, GENERIC AGING LESSONS LEARNED REPORT

Gentlemen:

In a Staff Requirements Memorandum dated July 2, 2001, the Commission approved the issuance of the set of documents that constitute improved guidance for license renewal. The Federal Register notice announcing the availability of the documents was published on August 3, 2001 (66 FR 40750). The improved guidance for license renewal consists of:

- Regulatory Guide 1.188, "Standard Format and Content for Applications to Renew Nuclear Power Plant Operating Licenses" and the endorsed Nuclear Energy Institute (NEI) guidance document NEI 95-10, "Industry Guideline for Implementing the Requirements of 10 CFR Part 54 - The License Renewal Rule," Revision 3.
- Standard Review Plan for License Renewal, "Standard Review Plan for the Review of License Renewal Applications for Nuclear Power Plants," NUREG-1800
- Generic Aging Lessons Learned (GALL) report, NUREG-1801

You, your organizations, and your colleagues contributed substantially to the development of these documents. We sincerely appreciate the time and effort contributed to the license renewal guidance and generic aging lessons learned. For your convenience, enclosed are copies of the guidance documents on CD-ROM. We find this format is much more portable. We look forward to working with you to incorporate further improvements to this guidance in the future.

Sincerely,

/RA/

Christopher I. Grimes, Chief
License Renewal and Standardization Branch
Office of Nuclear Reactor Regulation

Project No. 690
