**Subject:** Fwd: FW: NRC Request for FEMA Assistance - Spent Fuel Accident Risk

I sent this e-mail to you previously. I talked with OC Payne at FEMA about the attached comments. They are not FEMA's official comments to us. They are a FEMA staff members comments on an internal e-mail. Therefore, it is appropriate that we wait for official comments from FEMA in response to our request to FEMA for assistance on the EP Rulemaking Plan, and not consider the attached comments as FEMA's reply.

Dan

Previous message:

Attached are comments I received from OC Payne at FEMA on spent fuel accident risk. I believe most of the comments come from Elaine Chan, at FEMA.

Most of FEMA REP group are involved in REP Mtg in Reno, NV next week. I did talk to OC Payne and said we should try to set up a meeting for week of 4/17 or 24 to discuss.

I think if we share the rulemaking plan with FEMA and explain that offsite EP will not be removed until after EPA PAGs can no longer be exceeded Ms. Chan will be more comfortable with our approach.
