Mike & Sonia:

I learned yesterday that it appears that the results of the Quad Cities OSRE may be evaluated formally using the physical protection and reactor safety SDPs. Heads up!

Here's some info I have regarding the Quad Cities OSRE findings as provided to me by NRR. I am sure it will make more sense to you than to me. I have some additional detailed operations information that was provided to Dave Orrick of the OSRE team by the licensee on May 12. It is **Safeguards information**, and as you have no facility to store it, I'll keep it up here. You can review it at any time.

The attached indicates that one of the "cases," turns the SDP **RED**. Others are **WHITE**. I think you guys may need to evaluate that as a back-up for the work already done. I think we need to understand it so we can make coordinated decisions on any Agency action that may be necessary. The intermingling of the "old program" OSRE (this was the last of it's breed) and the new program SDP will take some understanding. Rather than speculate, let's just do what we can to risk-inform the results, so that we will be ready to assist when asked.

Let's keep in touch. If you need to prioritize this, let's talk to Jack and Steve and see where they believe is sits on your list of things to do. I'll try to find out more.

Jim
