# QUAD OSRE SDB panel

Dean:

Jack: Application of SDB to this (QUAD) OSRE - last of old round

"New" OSRE essentially same as "Old"

New - means under new insp program ~ or 2<sup>nd</sup> round

Jesse Arildson - QUAD "led" by HQs; subsequent will be led by Region  
Distinction in who is responsible

Jack: Every other 1<sup>st</sup> round OSRE - if found problems, gave licensees time to fix, returned - took no other actions such as enf., or characterization of issues

Only time we took enforcement, was corrective action - i.e. failed to fix

Orbit confirmed - Waterford + another plant arise from the Regional follow up

Then enforcement changed - added some other examples

Back & forth - uncertain of result - Sounds like O&E changed

Questions: How many enforcement actions based on OSREs?

Ans: None

However, have been enf. actions on drills  
Farley + Waterford  
= level IV
