Subject: Re: Fwd: QUAD CITIES STATION TIME LINE FOR DRILL #3

Glenn,

Our review of the timeline included two very experienced operator examiners (PT Yourg and Ann-Marie Stone), Mike Parker, and Laura Collins (former Resident at Quad Cities).

Jack

>>> Glenn Tracy 08/21 3:48 PM >>>

My position is that the LOOP did occur prior to entry. We cannot appear to have a "new" approach on this and that aspect had never been articulated to me, so I am sure it was never articulated to the licensee. I did not hear it during the exit meeting last week. I have discussed this with John T.

I still require a bottom line on whether the licensee's submittal is reasonable and doable. I would like to have Ops Examiners look at it tomorrow and then discuss with the region.

Dave T., please provide to me the use of one of our BWR examiners tomorrow. If region has such expertise available it would be appreciated. Thanks to all and John, for your observations and input.
Glenn

John

We need to talk further on this point. It is my understanding based on discussions with our security branch that that the LOOP occurs prior to entry to the protected area.

>>> John Thompson 08/18 1:39 PM >>>

I believe that the assumption that the LOOP occurs at time of entry into protected area is not the assumption taken by Ray. The assumption taken by the OSRE team was that the LOOP occurs at the point of entry into the control room by the adversaries, either by the placement of time charges outside of the plant, or due to actions in the control room. Either way, your response should reflect this point.

Glenn

For review and action.

Attached is the regional review of the licensees timeline as requested. I would be glad to discuss with you or your staff any questions you may have with this review. I would also be interested in knowing our next step.

>>> Glenn Tracy 08/17 11:58 AM >>>

For review and action.

Steve: Could you please have Mike and others on your staff take a look at this and provide insight to Dick. Please consider the acceptability of the procedures and training with appropriate regional personnel, as articulated by Jon's Thompson's concerns during the post-exit meeting.

Dick: Please coordinate with John T. and Ray and provide feedback to me.

B/32

The sooner the better for me, in light of management needs for info on this one.

Thanks, GT
