As a result of the discussion last week on the timeline for drill 3, the timeline was revised. Additionally, a document is in review that describes the consequences associated with the damage that was described to have occurred during drill 2. This document will be provided as soon as the internal reviews are complete. The attached documents were reviewed and determined not to contain safeguards information.

Should you have any questions on these documents please contact me at 630-663-3741.
