1. The intent of 10 CFR 20.203(c)(2)(iii) shall be implemented by satisfying the following conditions:
 - a. The entrance to each radiation area in which the intensity of radiation is greater than 100 mrem/hr but less than 1000 mrem/hr shall be barricaded and conspicuously posted.
 - b. The entrance to each radiation area in which the intensity of radiation is equal to or greater than 1000 mrem/hr shall be provided with locked barricades to prevent unauthorized entry into these areas. Keys to these locked barricades shall be maintained under the administrative control of the Shift Supervisor.
 - c. All such accessible high radiation areas shall be surveyed by Health Physics personnel on a routine schedule, as determined by the Supervisor-Health Physics, to assure a safe and practical program.
 - d. Any individual entering a high radiation area shall have completed the indoctrination course designed to explain the hazards and safety requirements involved, or shall be escorted at all times by a person who has completed the course.
 - e. Any individual or group of individuals permitted to enter a high radiation area per 1.d. above, shall be provided with a radiation monitoring device which continuously indicates the radiation dose rate in the area.
