On July 18 and August 28, 2001, conference calls were held with staff of the Virginia Electric and Power Company (G. Miller, D. Sommers, D. Lippard) to discuss NRC review of a license amendment that proposed to delete certain obsolete license conditions from the Surry operating licenses. The licensee proposed to remove these license conditions, including their identifying section numbers, and renumber the remaining license conditions. The NRC staff indicated we would prefer to retain the section numbers of deleted license conditions in the licenses. The licensee agreed that this was acceptable, although they preferred to renumber the remaining license conditions.
