Mr. Timothy Kobetz
Project Manager, Spent Fuel Project Office
U.S. Nuclear Regulatory Commission
11555 Rockville Pike
Rockville, MD 20852

Subject: Revision to Proposed Technical Specifications, Submittal of Revision 4 of the
Advanced NUHOMS® Storage System Application (TAC No. L23203)

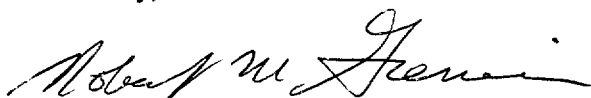

Dear Mr. Kobetz:

This letter is issued in response to a question raised during a telephone conversation with you on July 24, 2001. Accordingly, TN West is submitting changed pages to the Advanced NUHOMS® System SAR to revise Technical Specification 12.4.2.4. In addition, Table 12.2-1 is revised to correct an error in the minimum enrichment values specified for the Mixed Oxide (MOX) fuel. This correction makes this table consistent with analyses provided in other sections of the SAR and therefore has no other impact on the SAR.

Ten copies of the proprietary SAR changed pages are provided along with four copies of the associated non-proprietary SAR changed pages.

Please contact Mr. U. B. Chopra (510-744-6053) or me (510-744-6020) if you have any question regarding this transmittal.

Sincerely,

Robert M. Grenier
President and Chief Operating Officer

Docket 72-1029

Attachments:

1. Revision 4 replacement pages for the proprietary version of the Advanced NUHOMS® Storage System Application (10 copies)
2. Revision 4 replacement pages for the non-proprietary version of the Advanced NUHOMS® Storage System Application (4 copies)
