Office of the Secretary
U.S. Nuclear Regulatory Commission
Washington DC

August 27, 2001

DOCKET NUMBER
PROPOSED RULE 50.515254
(66FR19610) 60,70,73,76+110

To concerned persons

I am opposed to the NRC proposal
on rulemaking described in the Federal
Register, April 16, 2001, Vol. 66 to
change the licensing hearing process
for nuclear power reactors. The public
needs to be allowed to participate in
the processes that affect their communities.
A hearing process that is on-the-record
for the licensing of new reactors, the
re-licensing of aging reactors and any
industry amendments to operating license
safety requirements.

Also please do not support recycling
radioactive waste/metals into the marketplace.
This decision should not be rushed into as
its dangerous potential has not been fully
realized.

Thank you for taking the time to listen,
Sincerely, Marie Jarvis
