NOTE TO: Docket File

FROM: David E. LaBarge, Senior Project Manager, Section 1 \s\
Project Directorate II
Division of Licensing Project Management
Office of Nuclear Reactor Regulation

SUBJECT: OCONEE NUCLEAR STATION, UNITS 1, 2 AND 3 RE: TASK INTERFACE
AGREEMENT ON HIGH PRESSURE SERVICE WATER SYSTEM PIPING
BREAK IN AUXILIARY BUILDING (TAC NOS. MB1862, MB1863, AND MB1864)

The subject TAC numbers have been used in the review of the design of the high pressure service water system concerns related to the potential for pipe breaks at the Oconee Nuclear Station, Units 1, 2, and 3. Until recently the purpose of the discussions was to determine how best to characterize the provisions of a proposed Task Interface Agreement (TIA) from Region II so the proper review would be conducted. Since then it has been decided that a TIA is not needed. Therefore, this action closes the subject TAC numbers.

Docket Nos. 50-269, 50-170, and 50-287
