U.S. Nuclear Regulatory Commission
Washington, DC 20555

Dear Friend:

RE: NRC's proposed rule, "Changes to Adjudicatory Process,"
Federal Register, April 16, 2001, Vol. 66, pages
19609-19671

I am opposed to the U.S. Nuclear Regulatory Commission's proposed rule on "Changes to Adjudicatory Process." The public must have access to information and opportunities to participate in proceedings for issuing, amending or renewing nuclear plant licenses. This means full, formal, on-the-record hearings with the rights of discovery and cross-examination. The current process now provides for meaningful public participation and must not be changed.

Thank you for this opportunity to express my views.

Sincerely yours,

Edith Chase
