NRC TO MEET WITH EXELON GENERATION CO. TO DISCUSS SAFETY PERFORMANCE AT THE BRAIDWOOD NUCLEAR POWER PLANT

The Nuclear Regulatory Commission will meet with Exelon Generation Co. officials July 12 to discuss the NRC's annual assessment of safety performance at the Braidwood Nuclear Power Plant near Braidwood, Illinois.

The meeting will begin at 1 p.m. CDT and will be held at the plant's Training Building in Room 53, 35100 S. Route 53, near Braidwood. The public is invited to observe the session. NRC officials will be available after the meeting to answer questions.

The annual assessment, referred to as the End-of-Cycle assessment, evaluates safety performance at the Braidwood plant from April 2000 through March 2001, and informs plant officials of the NRC's plans for future inspections at the facility.

The Braidwood assessment letter and inspection report are available at <http://www.nrc.gov/OPA/ppr> or from the Region III Public Affairs Office. Current performance information for the plant is available at <http://www.nrc.gov/NRR/OVERSIGHT/ASSESS/index.html>.
