Mail Stop O-P1-17
Washington, D.C. 20555-0001

Donald C. Cook Nuclear Plant Units 1 and 2
NOTIFICATION OF EXTENSION OF A COMMITMENT DUE DATE

- Reference: 1) Letter from J. F. Stang (Nuclear Regulatory Commission), to R. P. Powers (I&M) "Donald C. Cook Nuclear Plant, Units 1 and 2 - Request for Additional Information, "License Amendment Request for Control Room Habitability" (TAC Nos. MA9394 and MA9395)," dated August 16, 2001.
- 2) Letter from M. W. Rencheck (I&M) to NRC Document Control Desk, "Donald C. Cook Nuclear Plant Units 1 and 2, Final Response to Nuclear Regulatory Commission Request for Additional Information Regarding License Amendment Request for Control Room Habitability," submittal C0801-02, dated August 17, 2001.

This letter informs the Nuclear Regulatory Commission (NRC) of a change in the date by which Indiana Michigan Power Company (I&M) will provide additional information pertaining to its analyses of potential post accident radiation doses to personnel in the control room.

Reference 1 transmitted an NRC Request for Additional Information (RAI) pertaining to atmospheric dispersion (X/Q) values used in I&M's analyses of potential post accident radiation doses to personnel in the control room. Reference 1 also documented I&M's commitment to provide a response to the RAI by September 14, 2001. In Reference 2, I&M stated that it would address the consequences of an error in processing stability data used in calculating the X/Q values by September 14, 2001.

A 001

I&M has determined that additional analyses are needed to address the above described issues. Therefore, I&M will provide a response to the August 16, 2001, RAI and will address the consequences of the stability data processing error by January 17, 2002. This change was discussed with the NRC staff on September 12, 2001.

Should you have any questions, please contact Mr. Ronald W. Gaston, Manager of Regulatory Affairs, at (616) 697-5020.

Sincerely,

S. A. Greenlee
Director of Design Engineering and Regulatory Affairs
