OFFICE OF SECRETARY  
RULEMAKINGS AND  
ADJUDICATIONS STAFF

To Whom It May Concern:

We need to realize that nuclear power has very dangerous aspects. Every precaution must be taken to ensure that accidents are prevented. Public knowledge and input is very important, therefore I am strongly opposed to the NRC proposed rulemaking as described in The Federal Register, April 16, 2001, Vol. 66 to change the licensing hearing process for nuclear power reactors. The public is entitled to full and meaningful participation in an on-the-record hearing process for the licensing of new reactors, the relicensing of aging reactors and industry amendments to operating license safety requirements.
