Sept 5, 2001

To Whom It May Concern,

I am opposed to the NRC proposed rulemaking as described in The Federal Register, April 16, 2001, Vol 66 to change the licensing ^{hearing} procedure for nuclear power reactors. The public is entitled to full participation in an on-the-record hearing process for new nuclear reactor licensing, as well as the relicensing of aging reactors and any industry amendments to operating license safety requirements.

I do not believe we should be building any new nuclear reactors and I think those in operation should be shut down -

Thank you,

Louise Baker
