RULEMAKINGS AND  
ADJUDICATIONS STAFF

NRC Secretary  
Washington, D.C.

Re: CFR Chapter 10, Part 2, Subpart G

Dear Secretary,

I am so glad the NRC wants to put nuclear power plants in operation all over the United States (with no formal hearings as part of the licensure process).

But, as we all know, citizen input is unnecessary because nuclear power is completely safe.

And a terrorist would never attack a U.S. nuclear power plant. Oh, of course not!

Sadly,
