

Docket Nos. 50-280
and 50-281

December 15, 1989

Mr. W. L. Stewart
Senior Vice President - Nuclear
Virginia Electric and Power Company
5000 Dominion Blvd.
Glen Allen, Virginia 23060

Dear Mr. Stewart:

SUBJECT: SIMULATOR CERTIFICATION FOR 10 CFR 55.45(b)(2) - SURRY
POWER STATION, UNIT NOS. 1 AND 2

We have completed our review of your submittal dated November 23, 1988, wherein you submitted NRC Form 474, "Simulation Facility Certification," for Surry-1&2 in compliance with 10 CFR 55.45(b)(2). Our review also included your response dated October 16, 1989 to our request for additional information dated August 23, 1989.

The staff finds the documentation to be complete with the additional information provided and requires no further information at this time. Our review was made only to ensure completeness of your documentation and did not verify the accuracy of the data or statements made in the certification. Further, our finding of completeness does not grant approval of the acceptability of a particular simulator for use in administering operating tests. Such approval is not required for simulator certification because Virginia Electric and Power Company has the responsibility for regulatory compliance with respect to your plant-referenced simulator.

Sincerely,

Original Signed By

Bart C. Buckley, Senior Project Manager
Project Directorate II-2
Division of Reactor Projects I/II
Office of Nuclear Reactor Regulation
