Washington, D.C. 20555-0001

Gentlemen:

Subject: Proposed License Amendment Related to Emergency Core Cooling System Pump
Net Positive Suction Head Requirements
Cooper Nuclear Station, NRC Docket 50-298, DPR-46

- Reference:**
1. Letter (NLS2001064) from J. H. Swailes (NPPD) to USNRC dated July 30, 2001, "Proposed License Amendment Related to Emergency Core Cooling System Pump Net Positive Suction Head Requirements."
 2. Letter (NLS2001075) from J. H. Swailes (NPPD) to USNRC dated August 23, 2001, "Proposed License Amendment Related to Emergency Core Cooling System Pump Net Positive Suction Head Requirements."

This letter provides non-proprietary versions of the General Electric (GE) reports submitted with References 1 and 2. In Reference 1, the Nebraska Public Power District (NPPD) submitted a request for amendment to Operating License DPR-46 to revise the Cooper Nuclear Station (CNS) license basis. The amendment request addresses the containment overpressure contribution to emergency core cooling system (ECCS) pump net positive suction head (NPSH) requirements. The amendment request included three GE reports submitted with requests to withhold from public disclosure in accordance with 10CFR 2.790. Reference 2 provided a revision of the report provided as Enclosure 3, GE-NE-T2300786-00-01, of the Reference 1 amendment request which revised the marked material that is considered proprietary. Both Reference 1 and Reference 2 indicated that non-proprietary versions of these reports would be submitted under separate letter. The Enclosures to this letter provide these non-proprietary versions of the GE reports.

By copy of this letter and attachments the appropriate State of Nebraska official is being notified in accordance with 10CFR 50.91(b)(1). Copies to the Region IV Office and the CNS Resident Inspector are also being sent in accordance with 10CFR 50.4(b)(1).

As indicated on the enclosed form, this letter contains no commitments.
