Subject: Fwd: SRM on COMSECY-00-0036 — Safeguards Performance Assessment

FYI - The only comment that I have is that the last requirement will be partially fulfilled with the ACD process paper that is due to the Commission this month. However, the adversary knowledge piece will need to be addressed separately (an opportunity to present a more complete discussion of protecting against the insider). Such an analysis would require more time than 03/01. I would estimate we could develop a response on insider knowledge and clear it through the system by 09/01. Sound reasonable?
