Mr. James F. Klapproth, Manager  
Engineering & Technology  
GE Nuclear Energy  
175 Curtner Ave  
San Jose, CA 95125

SUBJECT: REQUEST FOR WITHHOLDING INFORMATION FROM PUBLIC DISCLOSURE

Dear Mr. Klapproth:

By letter dated August 3, 2001, and affidavit dated August 3, 2001, executed by George B. Stramback, GE Nuclear Energy (GENE) submitted slides to be discussed during an August 6, 2001, teleconference with the NRC staff regarding emergency core cooling system (ECCS) suction strainer hydrodynamic loads and requested that they be withheld from public disclosure pursuant to 10 CFR 2.790. By letter dated August 17, 2001, and affidavit dated August 17, 2001, executed by David J. Robare, GE Nuclear Energy submitted slides to be used during an August 21, 2001, meeting between GENE and the NRC staff to discuss ECCS suction strainer hydrodynamic loads and requested that they be withheld from public disclosure pursuant to 10 CFR 2.790. A nonproprietary copy of the slides were not provided for placement in the NRC public document room or for addition to the Agencywide Documents Access and Management Systems Publicly Available Records System (ADAMS PARS) Library.

The affidavits stated that the submitted information should be considered exempt from mandatory public disclosure pursuant to 10 CFR 2.790 for the following reasons:

- a. Information that discloses a process, method, or apparatus, including supporting data and analyses, where prevention of its use by General Electric's competitors without license from General Electric constitutes a competitive economic advantage over other companies;
- b. Information which, if used by a competitor, would reduce his expenditure of resources or improve his competitive position in the design, manufacture, shipment, installation, assurance of quality, or licensing of a similar product;

We have reviewed your applications and the material in accordance with the requirements of 10 CFR 2.790 and, on the basis of your statements, have determined that the submitted information sought to be withheld contains trade secrets or proprietary commercial information and should be withheld from public disclosure.

Therefore, we have determined that the slides that were submitted in support of the August 6, 2001, teleconference and the August 21, 2001, meeting between GENE and the NRC staff, marked as proprietary, will be withheld from public disclosure pursuant to 10 CFR 2.790(b)(5) and Section 103(b) of the Atomic Energy Act of 1954, as amended.

Withholding from public inspection shall not affect the right, if any, of persons properly and directly concerned to inspect the documents. If the need arises, we may send copies of this information to our consultants working in this area. We will, of course, ensure that the consultants have signed the appropriate agreements for handling proprietary information.

If the basis for withholding this information from public inspection should change in the future such that the information could then be made available for public inspection, you should promptly notify the NRC. You also should understand that the NRC may have cause to review this determination in the future, for example, if the scope of a Freedom of Information Act request includes your information. In all review situations, if the NRC makes a determination adverse to the above, you will be notified in advance of any public disclosure.

Sincerely,

*/RA/*

Robert Pulsifer, Project Manager, Section 2  
Project Directorate I  
Division of Licensing Project Management  
Office of Nuclear Reactor Regulation
