PROPOSED RULE PR 73
(60 FR 24803)

Mr. John C. Hoyle
Secretary
U.S. NUCLEAR REGULATORY COMMISSION
Washington, DC 20555

Attention: Docketing and Service Branch

CHANGES TO NUCLEAR POWER PLANT SECURITY REQUIREMENTS ASSOCIATED
WITH CONTAINMENT ACCESS CONTROL; WISCONSIN ELECTRIC COMMENTS ON
PROPOSED RULE

Wisconsin Electric Power Company is pleased to submit the following comments in response to the Federal Register notice (May 10, 1995, 60 Fed. Reg. 24803) requesting public comment on the NRC's proposal to remove a requirement from 10 CFR 73 which requires licensees to separately control access to reactor containments during periods of high traffic.

Wisconsin Electric strongly supports the proposed revision to 10 CFR 73 and believes it will result in more efficient use of utility resources without degrading physical security. We applaud the commission's efforts to reduce regulatory burden and encourage the commission to continue to work cooperatively with licensees to identify additional opportunities for regulatory relief. Wisconsin Electric appreciates the opportunity to comment on this proposed rule. Should you have any questions regarding our comments, please contact David Butschli at (414) 221-2550.

Sincerely,

Gary M. Krieser
Manager
Industry and Regulatory Services
