Mr. John C. Hoyle
Secretary of the Commission
U. S. Nuclear Regulatory Commission
Washington, DC. 20555

ATTN.: Docketing and Service Branch

Subject: Entergy Operations, Inc. Comments on Changes to Nuclear Power Plant Security Requirements Associated with Containment Access Control

Reference: Federal Register Volume 60, Page 24803, dated May 10, 1995

CNRO-95/00013

Dear Mr. Hoyle:

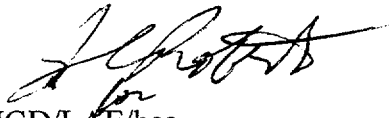

The referenced Federal Register listing invited comments on the NRC's proposed rule, "Changes to Nuclear Power Plant Security Requirements Associated with Containment Access Control." Entergy Operations the licensee for Arkansas Nuclear One, Units 1 and 2, Grand Gulf Nuclear Station, River Bend Station, and Waterford 3 Steam Electric Station has reviewed the Federal Register notice and offers the following comments for your consideration.

We endorse NEI's response to you on this subject. Entergy Operations agrees that the deletion of paragraph 73.55(d)(8), separate access control to containment, is appropriate for the reasons stated in the proposed rule change. Entergy Operations appreciates NRC's actions to eliminate this unnecessary requirement.
