The Honorable Lauch Faircloth, Chairman
Subcommittee on Clean Air, Wetlands, Private
Property and Nuclear Safety
Committee on Environment and Public Works
United States Senate
Washington, DC 20510

Dear Mr. Chairman:

Enclosed for the information of the Subcommittee is a copy of the final amendment to 10 CFR Part 73 to be published in the Federal Register.

The amendment will relieve nuclear power plant licensees of the requirement to separately control access to reactor containments during periods of high traffic, such as refueling outages. Deletion of this requirement will decrease the regulatory burden for the licensees without degradation of physical security. Moreover, since the assignment of security personnel to a radiation control area will no longer be required, there will be a decrease in occupational exposure.

All public comments were in favor of the proposed rule.

Sincerely,
DS

Dennis K. Rathbun, Director
Office of Congressional Affairs
