In SECY-0094 the staff noted that Region 1 had identified 92 additional sites with minor amounts of contamination and therefore not included on this list. Of these sites, 82 were remediated and closed, four were transferred to Agreement States for closure, and six were pending closure. One of the six sites pending Regional closure, Department of the Army, Frankford Arsenal, Philadelphia, PA, was added to above contaminated sites list because the Army is not able to remediate this site in a timely manner.
