Subject: Additional Information Supporting the License Amendment Request to Permit Uprated Power Operation, Dresden Nuclear Power Station and Quad Cities Nuclear Power Station

Reference: Letter from R. M. Krich (Commonwealth Edison Company) to U. S. NRC, "Request for License Amendment for Power Uprate Operation," dated December 27, 2000

In the referenced letter, Commonwealth Edison Company, now Exelon Generation Company (EGC), LLC, submitted a request for changes to the operating licenses and Technical Specifications (TS) for Dresden Nuclear Power Station, Units 2 and 3, and Quad Cities Nuclear Power Station, Units 1 and 2, to allow operation at uprated power levels. In a telephone conference on September 7, 2001, between representatives of EGC and Mr. S. N. Bailey, Mr. J. Hopkins, and other members of the NRC, the NRC requested additional information regarding these proposed changes. The attachment to this letter provides the requested information.

Should you have any questions related to this letter, please contact Mr. Allan R. Haeger at (630) 657-2807.

Respectfully,

K. A. Ainger
Manager – Licensing
Mid-West Regional Operating Group

Question

1. *Confirm that the calculations performed to support the response to Generic Letter (GL) 96-06, "Assurance of Equipment Operability and Containment Integrity During Design Basis Accident Conditions," were reanalyzed for extended power uprate (EPU) conditions.*

Response

The existing calculations for GL 96-06 concerning isolated piping sections potentially subject to overpressurization during a design basis accident were evaluated and revised as necessary for EPU conditions. Based on the evaluations, we confirmed the structural integrity of the containment pressure boundary post-EPU.
