Subject: In reply to your 10/1/01 phone call concerning your change of ownership notifications

Ms. Henken,

When we spoke on Monday, October 1, 2001, you informed me that Trus Joist MacMillan had sent letters on January 19, 2001 and February 5, 2001, to inform the USNRC that a change of ownership had occurred for the two facilities in Deerwood, MN and Buckhannon, WV. I have located these letters and we have verified that our General License Tracking System (GLTS) is up to date with regard to the information in the letters, except for the details concerning the devices/sources.

Since both sites possess devices with sources which are registerable under the recent changes to 10 CFR 31.5, they will each receive a letter packet from us with additional information on the registration process. This is a new, ongoing process we are using to update GLTS with device/source information. Additional information on this may be found at the WWW link: <http://www.nrc.gov/NMSS/IMNS/gl.html> .

Included in the packets will be the information we currently have in GLTS for the devices/sources at each location. By updating your company name, address and point of contact information, we have ensured that you will receive the letter packets. However, I would prefer that we allow this process to make the changes to the devices we have listed in GLTS, rather than delete information we currently have in GLTS based on the earlier letters.

As we discussed, I am sending this e-mail to you to close our discussion and confirm that the name and address changes have been made. Also, below I am listing some identifying information with regards to the location of the letters in our document management system, ADAMS, and your facility codes in GLTS. Please understand that the GLTS codes are arbitrarily assigned within the system and have no specific meaning other than uniquely identifying your facility's entry.

Sincerely,
William R. Ward, P.E.
