*Correction Amndt 58*  
*to DPR-37*

Dear Mr. Leasburg:

On May 9, 1979, we issued Amendment No. 48 to License No. DPR-37 for Surry Power Station, Unit No. 2 which incorporated a license condition which restricted steam generator tube plugging to 5%. On May 16, 1980, we issued Amendment No. 58 which revised the Technical Specifications limit on heat flux hot channel factor (Fq). This new limit was based on an ECCS analysis which assumed a steam generator tube plugging limit of 3%. In Amendment No. 58, we failed to delete the license condition of 5%.

Enclosed is a corrected page (page no. 6) which deletes the subject license condition.

Sincerely,  
 Original signed by:
