Docket Nos. 50-280
and 50-281

Mr. J. H. Ferguson
Executive Vice President - Power
Virginia Electric and Power Company
Post Office Box 26666
Richmond, Virginia 23261

Dear Mr. Ferguson:

The Commission has issued the enclosed Amendment No. 7/ to Facility Operating License No. DPR-32 and Amendment No. 7/ to Facility Operating License No. DPR-37 for the Surry Power Station, Unit Nos. 1 and 2, respectively. The amendments consist of changes to the Technical Specifications in response to your application transmitted by letter dated May 19, 1981.

The Unit 1 amendment revises the Technical Specifications to reflect changes as a result of modifications made to alleviate New Positive Suction Head (NPSH) problems with the Low Head Safety Injection and Recirculation Spray Pumps and modifications made to the containment spray system. Changes have been made to service water temperature, containment temperature, containment air partial pressure, refueling water storage tank volume and outside recirculation pump flow rate. These limits have been transferred to the Technical Specifications from the license.

The Unit 1 changes are the same as the changes made for Unit 2 in Amendment No. 59 on August 1, 1980, and therefore the Safety Evaluation (SE) supporting the Unit 2 changes applies to Unit 1 also. The August 1, 1980 SE states this. Therefore, we conclude that these changes are acceptable.

The Unit 2 amendment revises the Technical Specifications to reflect that the Unit 1 change above applies to both Units 1 and 2.

In preparing these amendments, we discovered that Amendment Nos. 66 and 65 dated February 25, 1981 inadvertently deleted paragraph 3.F from the licenses of Units 1 and 2. Paragraph 3.F was already deleted for Unit 2 by Amendment 59 dated August 1, 1980. This current action now correctly deletes Paragraph 3.F for Unit 1.

-2-

We have determined that the amendments do not authorize a change in effluent types or total amounts nor an increase in power level and will not result in any significant environmental impact. Having made this determination, we have further concluded that the amendments involve an action which is insignificant from the standpoint of environmental impact and, pursuant to 10 CFR §51.5(d)(4), that an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with the issuance of these amendments.

We have concluded, based on the considerations discussed above, that; (1) because the amendments do not involve a significant increase in the probability or consequences of accidents previously considered and do not involve a significant decrease in a safety margin, the amendments do not involve a significant hazards consideration, (2) there is reasonable assurance that the health and safety of the public will not be endangered by operation in the proposed manner, and (3) such activities will be conducted in compliance with the Commission's regulations and the issuance of these amendments will not be inimical to the common defense and security or to the health and safety of the public.

A copy of the Notice of Issuance is also enclosed.

Sincerely,

Original signed by:
S. A. Varga

Steven A. Varga, Chief
Operating Reactors Branch #1
Division of Licensing
