Senior Vice President - Power
Post Office Box 26666

Gentlemen:

The Commission has issued the enclosed Amendment Nos. 42 and 41 to Facility Operating License Nos. DPR-32 and DPR-37 for the Surry Power Station Unit Nos. 1 and 2. These amendments consist of changes to the Technical Specifications common to each license in response to your application dated March 15, 1978 as supplemented May 11, 1978.

These amendments, which affect only Surry Unit No. 1, relate to Cycle 5 operation of that reactor. Also as provided for in 10 CFR 50.12 of the Code of Federal Regulations we have granted the enclosed specific exemption from the requirements of 10 CFR 50.46(a)(1) for Surry Unit No. 1. We have determined that this exemption is authorized by law, will not endanger life or property or the common defense and security and is otherwise in the public interest. This specific exemption is limited to the time period necessary to complete computer calculations, acceptable to the NRC staff, that have been corrected for the errors described in Section II of the exemption.

Copies of the Safety Evaluations related to the license amendments, and the exemption, the Notice of Issuance of the license amendment and the granting of the Exemption are also enclosed. The Notice and the Exemption are being forwarded to the Office of the Federal Register for publication.

Sincerely,

Original signed by
