

Docket No. 50-336 ←

SEP 26 1972

The Millstone Point Company
ATTN: Mr. Donald C. Switzer
Vice President
P. O. Box 270
Hartford, Connecticut 06101

Gentlemen:

The Atomic Energy Commission has issued Amendment No. 2 to Construction Permit No. GPPR-76 issued to The Connecticut Light and Power Company, The Hartford Electric Light Company, Western Massachusetts Electric Company, and The Millstone Point Company for the Millstone Nuclear Power Station, Unit 2. A copy of Amendment No. 2 is enclosed.

The construction permit has been amended pursuant to the revision of 10 CFR Part 50, Appendix D, published in the FEDERAL REGISTER on May 13, 1972 (37 F.R. 9619), which eliminated authority for the inclusion in construction permits and operating licenses a specified condition relating to Federal and State environmental standards.

A copy of the amended regulation is also enclosed.

Sincerely,

Original Signed by
R. C. DeYoung

R. C. DeYoung, Assistant Director
for Pressurized Water Reactors
Directorate of Licensing

ATOMIC ENERGY COMMISSION
WASHINGTON, D.C. 20545

THE CONNECTICUT LIGHT AND POWER COMPANY,
THE HARTFORD ELECTRIC LIGHT COMPANY,
WESTERN MASSACHUSETTS ELECTRIC COMPANY, AND
THE MILLSTONE POINT COMPANY

(Millstone Nuclear Power Station, Unit 2)

DOCKET NO. 50-336

CONSTRUCTION PERMIT

Construction Permit No. CPPR-76
Amendment No. 2

Pursuant to the revision of the Atomic Energy Commission's regulations in 10 CFR Part 50, Appendix D, published in the FEDERAL REGISTER on May 13, 1972 (37 F.R. 9619), Construction Permit No. CPPR-76, issued to the above Companies for the Millstone Nuclear Power Station, Unit 2, is amended by deleting paragraph 2D thereof.

FOR THE ATOMIC ENERGY COMMISSION

Original signed by A. Giambusso

A. Giambusso, Deputy Director
for Reactor Projects
Directorate of Licensing

Date of Issuance:

SEP 26 1972

Title 10—ATOMIC ENERGY

**Chapter I—Atomic Energy
Commission**

**PART 50—LICENSING OF PRODUCTION
AND UTILIZATION FACILITIES**

**Implementation of National
Environmental Policy Act of 1969**

On September 9, 1971, the Atomic Energy Commission published in the FED-

RULES AND REGULATIONS

ERAL REGISTER (36 F.R. 18071) a revision of Appendix D of its regulation in 10 CFR Part 50, effective on publication. Revised Appendix D as published is an interim statement of Commission policy and procedure for the implementation of the National Environmental Policy Act of 1969 (NEPA) in light of the decision of the U.S. Court of Appeals for the District of Columbia Circuit in Calvert Cliffs' Coordinating Committee, Inc., et al. v. United States Atomic Energy Commission, et al., Nos. 24,839 and 24,871. The procedures in Appendix D apply to licensing proceedings for nuclear power reactors; testing facilities; fuel reprocessing plants; and other production and utilization facilities whose construction or operation may be determined by the Commission to have a significant impact on the environment. The procedures also apply to proceedings involving certain specified activities subject to materials licensing.

Paragraph 13 of section A of Appendix D of Part 50 provides that:

The Commission will incorporate in all construction permits and operating licenses for production and utilization facilities described in paragraph 1, a condition, in addition to any conditions imposed pursuant to paragraph 11, to the effect that the licensee shall observe such standards and requirements for the protection of the environment as are validly imposed pursuant to authority established under Federal and State law and as are determined by the Commission to be applicable to the facility that is subject to the licensing action involved. This condition will not apply to radiological effects since radiological effects are dealt with in other provisions of the construction permit and operating license.

The central premise of Appendix D prior to its revision in light of the earlier referenced Calvert Cliffs' decision, was the concept that the preservation of environmental values could best be accomplished through the establishment of environmental quality standards and requirements by appropriate Federal, State, and regional agencies having responsibility for environmental protection. The condition referred to was an aspect of NEPA implementation by the Commission reflecting that concept. Since the decision in the Calvert Cliffs' case, the Commission, in compliance with the mandate of the Court of Appeals, has revised its NEPA regulations to provide for an independent review of the environmental impact of the matters covered by such standards and requirements. Accordingly, the condition no longer serves the purpose intended. Any license conditions resulting from the Commission's independent review will be tailored to the particular facility. The Commission has, therefore, revoked paragraph 13 of section A of Appendix D of Part 50 since it is no longer necessary or appropriate. This amendment does not, of course, relieve holders of AEC licenses of any obligation which they otherwise have in regard to applicable standards and requirements imposed by other agencies under Federal or State law.

Because this amendment relates solely to elimination of an obsolete requirement, the Commission has found that good cause exists for omitting notice of proposed rule making and public procedure thereon as unnecessary and for making the amendment effective without the customary 30-day notice.

Accordingly, pursuant to the National Environmental Policy Act of 1969, the Atomic Energy Act of 1954, as amended, and sections 552 and 553 of title 5 of the United States Code, the following amendment to Title 10, Chapter 1, Code of Federal Regulations, Part 50, is published as a document subject to codification to be effective upon publication in the FEDERAL REGISTER (5-13-72).

In Appendix D, paragraph 13 of section A is revoked.

(Sec. 102, 83 Stat. 853; secs. 3, 161; 68 Stat. 922, 948, as amended; 42 U.S.C. 2013, 2201)

Dated at Germantown, Md., this 8th day of May 1972.

For the Atomic Energy Commission.

W. B. McCool,
Secretary of the Commission.
