Subject: Appreciation and Request for Publicatins

Dear Office of State Programs:

Thank you for the "Hazardous Scrap Beware" posters (NUREG/BR-0108 August 1998) which were recently provided in a training session or via direct mail. These posters are exactly what drivers using our facility need to be aware of for our radiation monitoring and response plan when collecting waste materials and scrap.

We operate a landfill where these posters were put on display in our scale facility. The vehicle drivers have expressed a high degree of interest in them. Additionally, owners of scrap and industrial waste operations in our county have expressed interest in having a copy of this publication to post in their crew areas.

Can we get ten of these posters to distribute to commercial operators? If there is a fee, please advise me before sending.

Thanks for the nice public service and for providing the copies we received.

Respectfully,

MICHAEL D. PAVELEK II
Executive Director
