Dear Mr. Opeka:

SUBJECT: MILLSTONE NUCLEAR POWER STATION, UNIT 2 - CORRECTION TO AMENDMENT NO. 191 (TAC NO. M91184)

On November 3, 1995, the Commission issued Amendment No. 191 to Facility Operating License No. DPR-65 for Millstone Nuclear Power Station, Unit 2, in response to your application dated December 21, 1994, as supplemented February 22, 1995.

The amendment revised the License Condition C.(3), Fire Protection, and certain of the Technical Specifications (TS) related to fire protection requirements. The Amendment changed the TS by relocating them to another controlled document, the Technical Requirements Manual.

We have discovered that the amendment was issued with an implementation date of "within 30 days." Since this period includes two holidays which would limit your staff necessary time for preparation for the implementation of the amendment, the implementation date should have been extended to at least 60 days. Enclosed is a corrected page 2 of the Amendment to Facility Operating License. Also, we have discovered that TS pages V, 6-6, and 6-8 did not provide complete notation of previous applicable amendments in the bottom margin of the pages. Enclosed are corrected pages V, 6-6 and 6-8.

Sincerely, Original signed by: Guy S. Vissing, Senior Project Manager Project Directorate I-3 Division of Reactor Projects - I/II Office of Nuclear Reactor Regulation
