MEMORANDUM TO: Joseph A. Murphy, Director
Division of Regulatory Applications
Office of Nuclear Regulatory Research

THRU: Cheryl A. Trottier, Acting Chief
Radiation Protection and Health Effects Branch
Division of Regulatory Applications
Office of Nuclear Regulatory Research

FROM: Alan K. Roecklein, Project Manager
Radiation Protection and Health Effects Branch
Division of Regulatory Applications
Office of Nuclear Regulatory Research

SUBJECT: REQUEST TO INCREMENTALLY FUND A PROJECT

I recommend that you approve the attached contractual action for Job Code G6590, Critical Reevaluation of the Linear-Nonthreshold Hypothesis. My recommendation is based on the following:

The contractor, NCRP, indicates that the planned FY-97 funding increment of 75K will be needed. NCRP intends to host and hold a workshop in late FY-1997 or early FY-1998 to develop a wide consensus on Critical Reevaluation of the Linear-Nonthreshold Hypothesis.

No work scope changes are needed to the last contract/work order.

The work completed thus far is of sufficiently high quality to proceed. NCRP has accumulated a large body of material on all sides of the issue and review by committee members is well underway. The completed work is sufficiently within budget and on schedule to continue.

- the spending is consistent with spending plan in ~~budget~~ *increment*
- the allocated funding has not been exceeded
- the interim deliverables have been received on schedule

The contractor, NCRP, indicates that the planned FY-97 funding increment of 75K will be needed. NCRP now intends to host and hold a workshop to develop a wide consensus on Critical Reevaluation of the Linear-Nonthreshold Hypothesis.
