

DOCKET NUMBER
 PROPOSED RULE PR 72
 (66FR 52486)

3

From: "Tom Thompson" <TThompson@NACINTL.COM>
To: <RLK@nrc.gov>
Date: Tue, Oct 30, 2001 9:02 AM
Subject: Priority: NAC Review of UMS Amendment 2 Technical Specifications

DOCKETED
 USNRC

NAC has completed a review of the UMS Amendment 2 Tech Specs as published in the Direct Final Rule now in the Rulemaking process, based on Glenn Michael's e-mail observations of 10/16/01.

October 30, 2001 (2:59PM)
 OFFICE OF SECRETARY
 RULEMAKINGS AND
 ADJUDICATIONS STAFF

I have concluded that Glenn is correct, as you also noted in our telecon yesterday, with regard to the pages that should be Amendment 0, rather than Amendment 1. In addition, I have also noted that there are some corrections of revision bars that are needed. The detail of the changes is as follows:

- Page A-2 Delete revision bars near the bottom of the page.
- Page A-3 Delete part of the revision bar near the top of the page (only Page A5-4 changed).
- Page A3-9 Add a revision bar near the top of the page (include ACTIONS line down through the OR line).
- Page A3-12 Move the revision bar upward; it should be on the blank line above SURVEILLANCE REQUIREMENTS.
- Page A3-13 Delete the revision bars and designate the page Amendment No. 0.
- Page A3-14 Delete the revision bars and designate the page Amendment No. 0.
- Page A3-15 Delete the revision bars and designate the page Amendment No. 0.
- Page A3-16 Designate the page Amendment No. 0.
- Page A3-18 Delete the revision bar and designate the page Amendment No. 0.
- Page A3-19 Designate the page Amendment No. 0.
- Page A3-20 Designate the page Amendment No. 0.
- Page A5-5 Designate the page Amendment No. 0.
- Page B2-14 Add revision bar on 2nd line of table (i.e., Inserted Control Element Assembly (CEA)) and delete the revision bar from the 2nd line of Note 1.
- Page B2-17 Extend the top revision bar upward to include the title of the table (this is a new page).
