Subject: Duke Power Company-Catawba Nuclear Station
Site Drinking Water - Line to Cooling Towers
State Construction Permit # 307405
File: CN-211.30

Attached please find a copy of the construction permit for the line going to the cooling tower yard. Please note that the project name on the permit reads- 'Catawba Nuclear Station - Warehouse #4'. I discussed this with the permit writer with SCDHEC since I felt this could be a little misleading. The permit writer stated that this was done due to the fact that this was previously permitted under this name. The calculations and specifications submitted in 1992 for the original permit had this title. Since these will be the same specifications and calculations used on this job the title should remain the same.

Please note that a permit to operate this portion of the line must be obtained prior to placing this portion of the line into service. The Environmental Center can perform the final bacteriological analysis for this system when the time comes if necessary.

Should you have any questions concerning this letter, please give me a call at (704) 875-5965. Thank you for your support.

Sincerely,

John Estridge, Engineer
