Dear Mr. McDonald:

SUBJECT: REVISED SAFETY EVALUATION (PROPRIETARY) SUPPORTING AMENDMENTS
72 AND 63, DATED SEPTEMBER 18, 1987

As a result of the discovery of some errors in our Safety Evaluation (SE) for Amendment Nos. 72 and 63 to facility operating licenses Nos. NPF-2 and NPF-8, respectively, we have revised the SE. The purpose of this reexamination was to determine if the errors affected our conclusions supporting the approval of the subject amendments.

Our reexamination showed that the errors were typographical or related to information which did not form the basis for any of our conclusions in the SE supporting Amendment Nos. 72 and 63.

We are enclosing the revised SE showing corrections indicated by marginal bars. We find that the revised SE does not change our previous conclusions regarding the acceptability of the Technical Specification changes approved in amendment Nos. 72 and 63 dated September 18, 1987.

Elinor G. Adensam, Director
Project Directorate II-1
Division of Reactor Projects I/II
