

Docket Nos. 50-348
and 50-364

JUL 14 1988

Mr. W. G. Hairston, III
Senior Vice President
Alabama Power Company
Post Office Box 2641
Birmingham, Alabama 35291-0400

Dear Mr. Hairston:

SUBJECT: CORRECTION OF AMENDMENT PAGES FOR AMENDMENT NO. 77 TO FACILITY
OPERATING LICENSE NO. NPF-2 AND AMENDMENT NO. 69 ISSUED TO FACILITY
OPERATING LICENSE NO NPF-8 - JOSEPH M. FARLEY NUCLEAR PLANT, UNITS 1
AND 2 (TAC NO. 68013 AND 68014)

On July 8, 1988, the Nuclear Regulatory Commission issued Amendment Nos. 77
and 69 to Facility Operating License No. NPF-2 and NPF-8 for the Joseph M.
Farley Nuclear Plant, Units 1 and 2. We are reissuing two pages for each
facility because the side marginal lines were inadvertently incorrectly
marked.

Please replace pages 6-2 and 6-3 in each of the previously issued amendments.

We apologize for any inconvenience this may have caused you.

Sincerely,

/s/
Edward A. Reeves, Sr. Project Manager
Project Directorate II-1
Division of Reactor Projects I/II

Enclosure: As stated

Williams and Ward
Post Office Box 306
Birmingham, Alabama 35201

Mr. D. N. Morey
General Manager - Farley Nuclear Plant
Post Office Box 470
Ashford, Alabama 36312

ADMINISTRATIVE CONTROLS

=====

6.2.2 FACILITY STAFF

- a. Each on-duty shift shall be composed of at least the minimum shift crew composition shown in Table 6.2-1.
- b. At least one licensed Reactor Operator shall be in the Control Room when fuel is in the reactor. In addition, at least one licensed Senior Reactor Operator shall be in the Control Room while the unit is in MODE 1, 2, 3 or 4.
- c. A Health Physics Technician[#] shall be on site when fuel is in the reactor.
- d. All CORE ALTERATIONS shall be directly supervised by either a licensed Senior Reactor Operator or Senior Reactor Operator Limited to Fuel Handling who has no other concurrent responsibilities during this operation.
- e. A site Fire Brigade of at least 5 members shall be maintained onsite at all times.[#] The Fire Brigade shall not include 3 members of the minimum shift crew necessary for safe shutdown of the unit and any personnel required for other essential functions during a fire emergency.
- f. Administrative procedures shall be developed and implemented to limit the working hours of unit staff who perform safety-related functions; e.g., Senior Reactor Operators, Reactor Operators, Health Physics Technicians, Auxiliary Operators, and key maintenance personnel. Adequate shift coverage shall be maintained without routine heavy use of overtime. The objective shall be to have operating personnel work a nominal 40-hour week while the plant is operating.

In the event that unforeseen problems require substantial amounts of overtime to be used, or during extended periods of shutdown for refueling, major maintenance or major plant modifications, on a temporary basis, the following guidelines shall be followed:

1. An individual will not be permitted to work more than 16 hours straight (not including shift turnover time).
2. There will be a break of at least 8 hours (which can include shift turnover time) between work periods.

[#] The Health Physics Technician and Fire Brigade composition may be less than the minimum requirements for a period of time not to exceed 2 hours in order to accommodate unexpected absence of the Health Physics Technician and/or Fire Brigade members provided immediate action is taken to restore the Health Physics Technician and/or Fire Brigade to within the minimum requirements.

ADMINISTRATIVE CONTROLS

=====

3. An individual will not work more than 16 hours in any 24-hour period, nor more than 24 hours in any 48-hour period, nor more than 72 hours in any 7-day period (all excluding shift turnover time).
 4. Except during extended shutdown periods, the use of overtime should be considered on an individual basis and not for the entire staff on a shift.
 5. Any deviation from the above guidelines for the minimum shift complement defined in Technical Specification Table 6.2-1 and health physics technicians shall be reviewed and approved by the General Manager - Nuclear Plant, his designee (Emergency Director) or higher authority. Any deviation from the above guidelines for key maintenance personnel shall be reviewed and approved by the Maintenance Manager or his designee (group supervisor).
- g. The Assistant General Manager - Plant Operations, Operations Manager and Shift Supervisors shall hold a senior reactor operator license. The Reactor Operators shall hold a reactor operator license.
