NOS. 96 AND 88 FOR THE JOSEPH M. FARLEY NUCLEAR PLANT, UNITS 1 AND 2
(TAC NOS. M79873 AND M79874)

On January 12, 1993, the Nuclear Regulatory Commission issued Amendment No. 96 to Facility Operating License No. NPF-2 and Amendment No. 88 to Facility Operating License No. NPF-8 to revise the fire protection license conditions. Due to an administrative error in numbering, the license conditions should read as follows:

UNIT 1

(4) Fire Protection

Southern Nuclear shall implement and maintain in effect all provisions of the approved fire protection program as described in the Final Safety Analysis Report for the facility and as approved in the Fire Protection Safety Evaluation Reports dated February 12, 1979, August 24, 1983, December 30, 1983, November 19, 1985, September 10, 1986, and December 29, 1986. Southern Nuclear may make changes to the approved fire protection program without prior approval of the Commission only if those changes would not adversely affect the ability to achieve and maintain safe shutdown.
