

November 19, 2001

Mr. Philip McCullough, Vice President
Accreditation Division
Institute of Nuclear Power Operations
700 Galleria Parkway, N.W.
Atlanta, GA 30339-5957

Dear Mr. McCollough:

Enclosed with this letter is the calendar year 2000 Annual Report on the Effectiveness of Training in the Nuclear Industry. This report is based on the NRC's (1) review of training-related issues derived from Human Factors Information System data, (2) observations of the INPO accreditation process, (3) conduct of for-cause training inspections, and (4) review of the results of operator licensing inspection and oversight activities. The report concludes that accredited training programs continue to meet the systems approach to training requirements contained in 10 CFR Parts 50 and 55. Although NRC monitoring has provided some evidence of weaknesses in training program evaluation, overall, all indicators suggest that the industry is implementing training programs in accordance with the regulations.

The issues detailed in this report were discussed in general terms during our coordination meeting on April 11, 2001. If you have questions on any of the topics discussed in this report please contact me at (301) 415-1004 or Mr. David Trimble, Operator Licensing and Human Performance Section at (301) 415-2942.

Sincerely,

/RA/

Bruce A. Boger, Director
Division of Inspection Program Management
Office of Nuclear Reactor Regulation

Enclosure: As stated
