Dear Mr. Clayton:

The Commission has issued the enclosed Amendment No. 31 to Facility Operating License NPF-8 for the Joseph M. Farley Nuclear Plant, Unit No. 2. The amendment consist of changes to the Technical Specifications in response to your application transmitted by letter dated December 10, 1982.

The amendment consists of an administrative change to delete eight (8) non-safety related hydraulic snubbers from Technical Specification Table 3.7-4a.

A copy of our related Safety Evaluation is also enclosed. The Notice of Issuance will be included in the Commission's next regular monthly Federal Register notice.

Sincerely,

ORIGINAL SIGNED BY

Edward A. Reeves, Project Manager
Operating Reactors Branch #1
Division of Licensing

ALABAMA POWER COMPANY

DOCKET NO. 50-364

JOSEPH M. FARLEY NUCLEAR PLANT, UNIT NO. 2

AMENDMENT TO FACILITY OPERATING LICENSE

Amendment No. 31
License No. NPF-8

1. The Nuclear Regulatory Commission (the Commission) has found that:
 - A. The application for amendment by Alabama Power Company (the licensee) dated December 10, 1982, complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act) and the Commission's rules and regulations set forth in 10 CFR Chapter I;
 - B. The facility will operate in conformity with the application, as amended, the provisions of the Act, and the regulations of the Commission;
 - C. There is reasonable assurance: (i) that the activities authorized by this amendment can be conducted without endangering the health and safety of the public, and (ii) that such activities will be conducted in compliance with the Commission's regulations;
 - D. The issuance of this license amendment will not be inimical to the common defense and security or to the health and safety of the public; and
 - E. The issuance of this amendment is in accordance with 10 CFR Part 51 of the Commission's regulations and all applicable requirements have been satisfied.
2. Accordingly, the license is amended by changes to the Technical Specifications as indicated in the attachment to this license amendment, and paragraph 2.C.(2) of Facility Operating License No. NPF-8 is hereby amended to read as follows:

B401200032 B40110
PDR ADOCK 05000364
P PDR

(2) Technical Specifications

The Technical Specifications contained in Appendices A and B, as revised through Amendment No. 31, are hereby incorporated in the license. The licensee shall operate the facility in accordance with the Technical Specifications.

3. This license amendment is effective as of its date of issuance.

SAFETY EVALUATION BY THE OFFICE OF NUCLEAR REACTOR REGULATION
RELATED TO AMENDMENT NO. 31 TO FACILITY OPERATING LICENSE NO. NPF-8

ALABAMA POWER COMPANY

JOSEPH M. FARLEY NUCLEAR PLANT, UNIT NO. 2

DOCKET NO. 50-364

INTRODUCTION

By letter dated December 10, 1982, Alabama Power Company (licensee) requested deletion of eight (8) non-safety related hydraulic snubbers from the Unit 2 Technical Specification Table 3.7-4a. The change was proposed as an administrative change since the snubbers were included in the Technical Specifications in error.

DISCUSSION AND EVALUATION

During a verification review of hydraulic snubbers installed at Joseph M. Farley Nuclear Plant, Unit 2, eight (8) non-safety related snubbers were found to be inadvertently included in Technical Specification Table 3.7-4a, "Safety Related Hydraulic Snubbers." The eight (8) snubbers are installed on the main steam piping inside the turbine building and are not required for any safety related function. Since these snubbers are not required for any safety related function, the Technical Specification Table should be corrected. Otherwise, unnecessary surveillance tests and operability criteria are imposed for these non-safety related snubbers. The Commission intends that only safety related snubbers be subjected to these restrictions.

SAFETY SUMMARY

Based on the above discussion and evaluation, the deletion of the eight (8) non-safety related hydraulic snubbers from the Table 3.7-4a is in accordance with the intent of the Technical Specifications and is therefore accepted.

ENVIRONMENTAL CONSIDERATION

We have determined that the amendments do not authorize changes in effluent types or total amounts, nor increases in power levels, and will not result in any significant environmental impact. Having made this determination, we have further concluded that the amendments involve actions which are insignificant

8401200034 840110
PDR ADOCK 05000348
P PDR

from the standpoint of environmental impact and, pursuant to 10 CFR 51.5(d)(4), that an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with the issuance of these amendments.

CONCLUSION

We have concluded, based on the consideration discussed above, that: (1) there is reasonable assurance that the health and safety of the public will not be endangered by operation in the proposed manner, and (2) such activities will be conducted in compliance with the Commission's regulations and the issuance of the amendments will not be inimical to the common defense and security or to the health and safety of the public.
