Re: Sludge pile and U-bends

Wayne:

I have two reports that I have already written that I can send you. One has the C-scan and profile of the "Monkey Tube", the other has the 1997 C-scans of three of the tubes that were detectable in the 1997 outage. I am working on ANO now and have taken the IP2 data off my computer. As soon as I get this emergency data done, I'll reload the IP2 data and make the graphics for you.
