DOCKET NOS.: 50-327/328

Mr. H. G. Parris
Manager of Power
Tennessee Valley Authority
500A Chestnut Street, Tower II
Chattanooga, Tennessee 37401

Dear Mr. Parris:

Subject: Authorization of Technical Specification Changes for Sequoyah
Units 1 and 2

This confirms our telephone authorization of June 18, 1982, for changes in the Technical Specifications for Sequoyah Units 1 and 2, as requested in your teletype dated June 18, 1982, on containment sump level instrumentation and procedure requirements. For a period of thirty days commencing on June 18, 1982, the following changes are authorized:

1. The logic for the automatic switchover of ECCS suction from the RWST to containment sump shall be defeated such that the switch can only be performed manually.
2. Operator procedures shall be revised for this period to insure that a manual switchover, if required, is performed properly. Region II concurrence is required for these procedures.

The amendments to the Technical Specifications that reflect the above authorized changes, our Safety Evaluation Report, and the Federal Register Notice, will be sent to you when completed.

Sincerely,

Original signed by
Robert L. Tedesco
