

November 29, 2001

APPLICANT: Duke Energy Corporation

FACILITY: Catawba Nuclear Station, Units 1 and 2

SUBJECT: SUMMARY OF MEETING HELD IN SUPPORT OF THE ENVIRONMENTAL REVIEW FOR THE CATAWBA UNITS 1 AND 2 LICENSE RENEWAL APPLICATION (TAC NOS. MB2031 AND MB2032)

On Tuesday, October 23, 2001, members of the U.S. Nuclear Regulatory Commission (NRC) staff held public meetings in Rock Hill, South Carolina, concerning the staff's environmental review of the application submitted by Duke Energy Corporation (Duke) for renewal of the operating licenses for its Catawba Nuclear Station, Units 1 and 2. The purpose of the meetings was to provide the public with an opportunity to provide comments on the scope of the draft supplemental environmental impact statement (DSEIS) to be issued by the NRC staff. Afternoon and evening sessions were held to allow maximum public participation. Formal presentations were made by Rani Franovich and James Wilson of the NRC staff.

The DSEIS will be a plant-specific supplement for Catawba Units 1 and 2 to the "Generic Environmental Impact Statement for License Renewal of Nuclear Plants" (NUREG-1437). The staff presenters outlined the overall license renewal process, provided a description of the National Environmental Policy Act review process, and discussed the environmental requirements outlined in 10 CFR Part 51.

In addition, in an effort to improve communication and increase interaction with members of the public, the staff conducted open houses for one hour prior to each meeting session. The NRC and Duke provided displays and brochures and met with members of the public to answer questions about the proposed renewal of the Catawba operating licenses. Attachment 1 is a corrected transcript for both meetings. Attachment 2 is a copy of the presentation slides. Attachment 3 is a list of attendees for both the 1:30 pm and 7:00 pm sessions.

After the formal presentations given by the NRC staff, members of the public, Duke, and local and state officials were invited to provide comments. More than 100 people attended the two sessions with several dozen making comments. Attendees included representatives of the NRC, Duke, and the nuclear industry; local government officials; state agency officials; special interest groups, and other members of the public.

At the evening session, a representative of the Blue Ridge Environmental Defense League (BREDL) requested an extension to the scoping period for Catawba. After due consideration, the staff has determined that it is not necessary to formally extend the scoping period because the public has had sufficient access to the relevant documents.

Original Signed By: JHWilson

James H. Wilson, Senior Project Manager
Risk Informed Initiatives, Environmental,
Decommissioning, and Rulemaking Branch
Division of Regulatory Improvement Programs
Office of Nuclear Reactor Regulation

Docket Nos. 50-413 and 50-414
